## Our Promise

*As a manufacturer & supplier we are determined to build on our established reputation as one of the industry leaders for customer care and quality products. We will continue to grow by exceeding our customers' expectations at every opportunity and further establish ourselves as a reliable partner for the future.*

**Peter Doherty, Managing Director,  
Garage Door Systems Limited**

”

At Garage Door Systems we know that our reputation is built upon the trust we inspire in every customer.

We want you to choose a Garage Door Systems garage door because you have the confidence in us as a company to know that:

- The products we make are well designed, built to last and are a pleasure to use every day. 
- All the garage doors we make come with our satisfaction promise and carry the performance and safety assurance of a CE mark. 
- Every door is made to order and made to measure for the ideal fit. 

We've been making garage doors since 1994 and our reputation is built on the half a million + of our garage doors and openers that have become part of homes throughout the UK & Ireland.

Quality, safety and security are held as our most important values.

It's essential that your new garage door is made to last, operates safely and provides a good level of security. Garage Door Systems' Design Engineers have created garage doors that lead the industry for their use of high grade materials and design features that ensure operation is not only safe but easy and reliable, day-in, day-out.

Quality extends to the service we provide to support our products and the team at Garage Door Systems is committed to making sure every contact is handled with courtesy and professionalism.

## Exceptional performance and build quality

The DuraRoll single skin roller door with its patented broad profile design offers exceptional performance combined with enhanced security and colour choice. Every door is made to measure for a perfect fit.

### Security as standard

- Made with 0.5 gauge thick steel for extra strength.
- Manual option has solid lock rods and a metal lock body making it extremely secure.
- Automated option is held closed by positive force and includes Evolution technology for secure operation & peace of mind.

### Draught resistance

- Bottom weather seal that compresses against the floor to help keep out draughts and debris.
- Guide tracks fit behind the garage opening and enclose the door curtain to help reduce draughts.

### Safety built-in

- CE marked for safety and tested to the latest European safety legislation.
- Force sensing automation stops and reverses on detection of an obstruction.
- Lifting spring is out of reach within the door barrel.

### Remote control

- Available with the world's number one remote control motor from LiftMaster™.
- LED courtesy light.
- Reliable and secure - holds the door closed by positive force and includes Evolution technology for secure operation & peace of mind.

### Extra space!

- Fitted behind the garage opening, it adds up to six inches of drive through width.
- Vertical travel means the door has no "kick-out" and enables you to park right up to the garage door inside and out.
- Spring assisted opening means manual opening is smooth and easy.

### Robust quality

- High grade materials and durable low maintenance finishes.
- Deeper guide tracks and 0.5 gauge steel door curtain add strength and better resistance to minor everyday knocks and bumps.

### Stylish

- Broad profile ribs are patented and unique to Garage Door Systems. Deeper ribs suit a domestic setting better than narrow 'industrial' rib designs.
- Great choice of low maintenance, wipe-clean Plastisol colours.

### Convenience - park right up!

- Space saving - As the curtain rolls neatly up behind your garage lintel there are no tracks inside your garage providing additional space and "park right up" convenience.

Juniper Green Plastisol Finish

# Light, smooth and quiet

Every detail considered and chosen for performance and durability...

Extra Easy 

### Lock Handle

All DuraRoll steel roller doors are supplied with a handle and lock as standard.

Security Guard 

### Enhanced Security

Highly pick resistant steel lock barrel mechanism as standard on each DuraRoll steel roller door.

Safety Sure 

### Photo Eyes

Non contact photo eyes are an optional safety feature. Once the infrared beam is broken, the door automatically reverses providing additional safety.

Weather Shield 

**Bottom Seal**  
Robust rubber bottom seal secured in a corrosion resistant aluminium profile.

DuraRoll  
Steel Roller Garage Door

Smart Touch

**Automation**

All single skin roller doors including the mini can easily be automated with the LiftMaster™ LM650 side mount motor.

Built to Last

**Welded Brackets**

DuraRoll support brackets are substantially stronger than other doors - thicker steel and welded joints ensure strength and a powder coat finish neatens their appearance.

Built to Last

**Steel Guides**

The door curtain is protected with reinforced nyloflex webbing that ensures smooth running and is secured within full length steel guides.

Security Guard

**Lock Bars**

Manual doors are held in the closed position via dual lock bars that engage within the steel guides.

# Power up with the world's No.1!

- DuraRoll garage doors are available with the option of a LiftMaster™ remote control drive system.
- LiftMaster™ is the worldwide No.1 for garage door automation and control systems.
- The LiftMaster™ LM650 Drive Motor has a 2 year warranty.
- Every automated door must be CE marked on completion of the installation, once all safety systems have been tested for sensitivity and the door and drive checked and properly commissioned. CE marking of the completed automated door system is the law (not just the individual components such as the door and drive).
- Garage Door Systems strongly recommends that you do not fit a door and operator that does not comply with the law, and that you do not purchase any product that will not be CE marked and tested for safe operation at your home - safety first!

Why leave the comfort and safety of your car when you can press a button and be home and dry?!

## LM650 EVO

- LiftMaster's™ LM650 EVO has the power and performance to open even the largest door.
- LM650 EVO - 500 Newton.
- Two 4-button mini transmitters with sliding cover, 433 MHz, LED battery indicator.
- 1 wireless control station to operate up to two doors.
- LED lighting rated to over 20 years of normal service. Automatically turns off 2.5 mins after door closing.
- Convenient pull cord to disconnect the door drive allowing manual operation of the door in case of power cut. Optional external disconnect available.
- Soft-start and soft-close.
- Durable - direct drive maintenance-free, 12 Volt DC, motor gear.
- Safe - force sensing automatically reverses upon meeting an obstruction.
- Secure - the opener acts as a positive lock on your door.
