

ProMatic 4

Premium quality at an attractive price

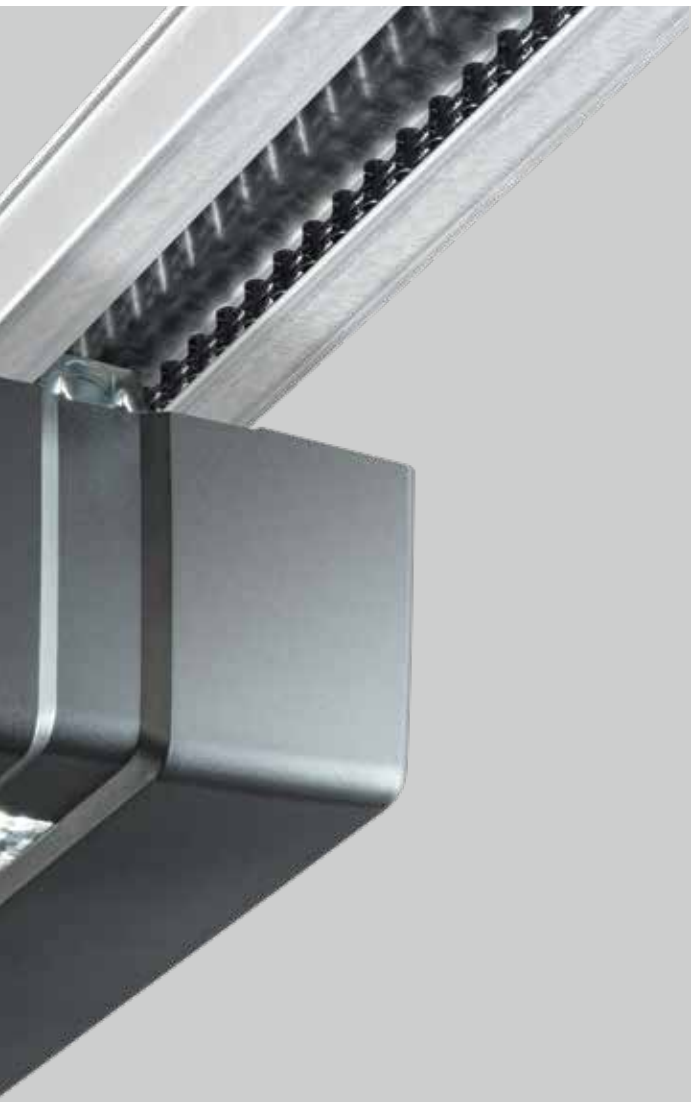

You can open your garage door easily and quickly with the hand transmitter or radio button. Of course, you do not have to do without comfort, for example the ventilation function and uniform lighting. And thanks to the ProMatic Akku, you can enjoy all the benefits of an automatic operator in garages without a power connection.

Standard hand transmitter HSE 4 BS, textured surface black with plastic caps

Special features**

Quick door opening

An up to 40 % faster opening speed*** means you can drive conveniently into your garage.

Simple query of the door position

You can use the optional HS 5 BS hand transmitter or internal push button FIT 5 at any time to check that your garage door is closed.

Convenient garage ventilation

Using the ventilation position****, you can automatically ventilate your garage without completely opening the door (see pages 44 – 45).

Switchable LED lighting

The operator light with 10 LEDs illuminates your garage well and up to 2 times*** brighter.

Intelligent networking ■ NEW

Optional Smart Home system modules are easily connected via the HCP interface (see pages 36 – 37).

Low power consumption

In standby, the operator uses less than 1 watt and protects the environment while also saving costs.

ProMatic 2 Akku for garages without a power connection

If your garage does not have a power connection, the ProMatic 2 Akku is the perfect solution for you. Depending on the frequency of daily door cycles you can control your operator up to several weeks. Once the battery is empty, you can recharge it via a standard power outlet, for example over night. The optional solar module is particularly convenient. It charges the battery automatically (see page 31).
